

CERTH's IoT Platform: an application in the nZEB Smarthouse DIH

Nikos Katsaros, CERTH/ITI

CERTH SmartWins Summer School: Day 3

06 July 2023

Thessaloniki

The nZEB Smart Home DIH

- A rapid prototyping & novel technologies demonstration infrastructure resembling a real domestic building where occupants can experience actual living scenarios while exploring various innovating smart IoT-based technologies.
- **Fully operational** Digital Innovation Hub since 2017
- **Constantly evolving collaborations** in Regional, National, & EU level
- Already participates/has participated as a pilot infrastructure in more than **20 R&D** projects
- **Active role** in most EU initiatives for DIHs so far

Solutions

Smart Energy
Microgrid

Smart RES

Smart Health

Smart Monitoring
& Control

Smart Human
Behaviour Analysis

Infrastructure

As the first Smart near-Zero Energy Building in Greece, it combines **enhanced construction materials** and **intelligent ICT solutions** creating a future-proof, sustainable and active testing, validating and evaluating ecosystem.

Infrastructure – the state of the art construction concept

- Cutting-edge envelope **insulation materials**
 - Thermal insulation
 - Sound insulation
 - Fire protection
 - Passive Ventilation
 - Mechanical endurance
- **Triple and Double glasses** for windows with extremely **low thermal losses (0.6 / 1.1 W/m²)**
- Complete access to the envelope for further interventions

Infrastructure – the first grid connected microgrid in Greece

- Integration of **multiple heterogeneous renewable energy technologies** into a single ecosystem:
 - 9,57 kWp Thin Film CIS **PVs** (rooftop)
 - 0,85 kWp a-Si **PVs** (east facade)
 - 2 kWp Vertical Axis Wind Turbine
 - 5 kWh Li-on **Battery**
 - Controllable and non Controllable **Loads**
 - Up to 22kW **EV Charger** – V0G / V1G
 - Protection systems for automated / controlled transition from grid-connected to **islanded operation** and vice versa.
- Real-time optimized energy management

Infrastructure – the first grid connected microgrid in Greece

Infrastructure – smart, interoperable monitoring & control systems

- Light dimming
- HVAC full control
- Smart, wifi-enabled home appliances
- Multi-layered smart meters (electricity, water etc.)
- A highly diverse (IoT) multi-sensorial & actuation network for multidisciplinary case studies (environment, energy, health, etc.)
- **One advanced, flexible solution to unify them all: CERTH's IoT Platform**

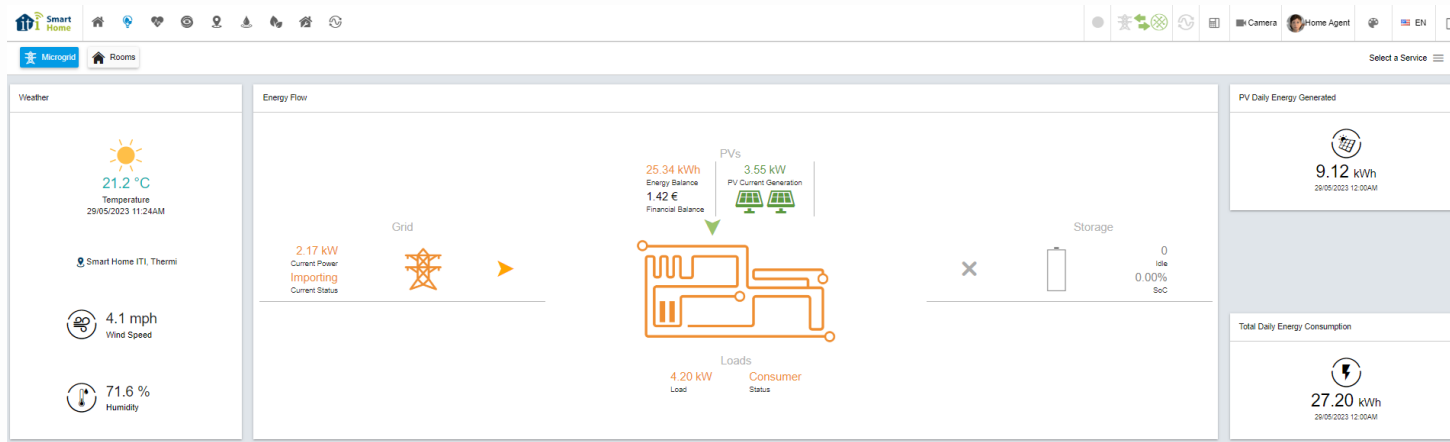

IoT Platform – semantic interoperability

- Aggregating devices using different communication protocols through a single management interface

IoT Platform – monitoring, control and intelligence

Real-life testbed– in-house developed service robots

a Digital Innovation Hub
powered by CERTH/ITI

Live demonstration

Thank you
